

Suggested Reading List and Useful Websites Pertinent to the Core Learning Area of Critical Thinking

The following is a list of resources that contain information on specific strategies for facilitating critical thinking among students. While some pedagogical practices can be applied across various educational contexts, this resource list attempts to focus on higher education and college-level teaching.

The list identifies literature and websites that describe how instructional technology can be applied to learning environments. In addition, the list includes specific examples of courses and assignments that promote critical thinking. Also provided are pertinent articles and websites meant to help inform any discussion related to the importance of critical thinking as a core academic skill.
